

GRAND FIRE PROTECTION DISTRICT NO. 1

Code Enforcement International Fire Code 2006

Grand Fire Protection District No. 1 recognizes the need for a modern fire code addressing conditions hazardous to life and property from fire, explosion, hazardous materials and occupancy of buildings and premises. The International Fire Code 2006 edition is designed to meet these needs through model code regulations that safe guard the public health and safety in all communities, large and small.

The International Fire Code provisions provide many benefits, among which is the model code development process that offers Grand Fire Protection District No. 1 forum for the Fire Marshall to discuss performance and prescriptive code requirements. This forum provides an area to debate proposed revisions. The International Fire Code also encourages consistency in the application of provisions.

All buildings in Grand Fire Protection District No. 1 are required to follow the provisions of the International Fire Code 2006.
